CONTENTS

Volume 23, Issue Nos. 1–15

International Journal for

NUMERICAL AND ANALYTICAL METHODS
IN GEOMECHANICS

Issue No. 1, January 1999

Non-local Effects on Dynamic Damage Accumulation in Brittle Solids: E. P. Chen . . 1

Computational Model for the Simulation of the Shield Tunneling Process in Cohesive Soils: M. Y. Abu-Farsakh and G. Z. Voyiadjis 23

Seismic Plastic Deformation in the Free Field: C. Huang, K. L. Fishman and P. Richards, Jr 45

Three Dimensional Elasto-viscoplastic Finite Element Analysis of Reinforced Rock Masses and its Application: S.-H. Chen and P. Egger 61

Face Stability of Shallow Circular Tunnels Driven Under the Water Table: a Numerical Analysis: P. de Buhan, A. Cuvillier, L. Dormieux and S. Maghous 79

CONFERENCE DIARY 97

CONTENTS LISTING
Int. J. Numerical Methods in Engineering, volume 44, issues 1 and 2 101

Issue No. 2, February 1999

Finite Element Analysis of Reinforced Embankment Foundation: A. Varadarajan, K. G. Sharma and M. A. A. Aly 103

Elastic Solutions for a Transversely Isotropic Half-space Subjected to Buried Asymmetric-loads: C. D. Wang and J. J. Liao 115

Numerical Modelling of Coupled Flow and Deformation in Fractured Rock Specimens: M. Bai, F. Meng, D. Elsworth, Y. Abousleiman and J.-C. Roegiers 141

Analytical Solutions for Stresses and Displacements Around Tunnels Driven in Cross-anisotropic Rocks: A. M. Hefny and K. Y. Lo 161

BOOK REVIEW
New Advances in Model Synthesis of Large Structures, ed. L. Jezequel 179

CONFERENCE DIARY 181

CONTENTS LISTING 185

Issue No. 3, March 1999

Finite Element Analysis for a Finite Conductivity Fracture in an Infinite Poroelastic Medium: Y. C. Li 187

Constitutive Modelling of a Reinforced Soil using Hierarchical Model: A. Varadarajan, K. G. Sharma and K. M. Soni 217

A Method for the Analysis of Large Vertically Loaded Pile Groups: D. C. Hong, Y. K. Chow and K. Y. Yong 243

SHORT COMMUNICATION
Prediction of Elastic Settlement of Rectangular Raft Foundation—a Coupled FE–BE Approach: J. J. Mandal and D. P. Ghosh 263

LETTER TO THE EDITOR
Discussion on: Propagation of Torsional Surface Waves in Viscoelastic Medium: J. M. Carcione 275

CONFERENCE DIARY 277

CONTENTS LISTING 279

Issue No. 4, 10 April 1999

A Mixed Mode Rock Fracture Model for the Prediction of Crack Path: R. W. Lewis and B. Koosha 281

A Comparison of Incremental Behaviour of Elastoplastic and CLoE Models: R. Chambon, D. Caillerie, J. Desrues and S. Crochepeyre 295

A Semi-analytical Model for the Simulation of Solute Transport in a Network of Fractures Having Random Orientations: K. S. Novakowsi and J. D. Bogan 317

Modelling of Submarine Landslides of Rock and Soil: C. Mariotti and P. Heinrich . . 335

Finite Element Analysis of Consolidation of Layered Clay Soils Using an Elastic Visco-plastic Model: G. Zhu and J.-H. Yin 355

BOOK REVIEW: *Finite-element Modelling of Unbounded Media*, by J. P. Wolf and C. Song: Reviewed by E. Kausel 375

CONFERENCE DIARY 377

CONTENTS LISTING 382

Issue No. 5, 25 April 1999

Analysis of the Vane Test Considering Size and Time Effects: A. Pérez-Foguet, A. Ledesma and A. Huerta 383

General Stability of Two-dimensional Slopes Based on Sarma's Method: M. Jie, C. Y. Chen and J. J. Zhang 413

Efficient Solution for Matrix-fracture Flow with Multiple Interacting Continua: E. H. Smith and M. S. Seth 427

SHORT COMMUNICATIONS

Analytical Method for Analysis of Slope Stability: J. Cao and M. M. Zaman 439

Modified Mohr–Coulomb-type Micromechanical Failure Criteria for Layered Rocks: Y.-S. Lai, C.-Y. Wang and Y.-M. Tien 451

CONFERENCE DIARY 461

CONTENTS LISTING 465

Issue No. 6, May 1999

Biot Consolidation Analysis with Automatic Time Stepping and Error Control: Part 1: Theory and Implementation: S. W. Sloan and A. J. Abbo 467

Biot Consolidation Analysis with Automatic Time Stepping and Error Control: Part 2: Applications: S. W. Sloan and A. J. Abbo 493

DEM Simulation of Granular Media–Structure Interface: Effects of Surface Roughness and Particle Shape: R. P. Jensen, P. J. Bosscher, M. E. Plesha and T. B. Edil . . . 531

Three-dimensional Finite Element Modeling for Consolidation due to Groundwater Withdrawal in a Desaturating Anisotropic Aquifer System: J.-M. Kim and R. P. Parizek 549

CONFERENCE DIARY 573

Issue No. 7, June 1999

Poroelastic-plastic Consolidation—Analytical Solution: W. G. Pariseau 577

Finite Element Simulation of the Thermoviscoplastic Behaviour of Bituminous Concrete: P. Royis and J. F. Seignol 595

Theoretical and Numerical Analyses of Convective Instability in Porous Media with Upward Throughflow: C. Zhao, B. E. Hobbs and H. B. Mühlhaus 629

A Lattice Type Model for Particulate Media: M. Budhu, S. Ramakrishnan and G. Frantiziskonis 647

Thermomechanical Model of Hydration Swelling in Smectitic Clays: I Two-scale Mixture-theory Approach: M. A. Murad 673

Thermomechanical Model of Hydration Swelling in Smectitic Clays: II Three-scale Inter-phase Mass Transfer: Homogenization and Computational Validation: M. A. Murad 697

Numerical Modelling for Clays with Internal Discontinuity Surfaces: G. Sakellariadi and G. Scarpelli 721

CONFERENCE DIARY 745

CONTENTS LISTING 749

Issue No. 8, July 1999

Development and Validation of Computer Models for Structures in Jointed Rock: P. E. Senseny and T. A. Pučik 751

Solutions for the Deformations and Stability of Elastoplastic Hollow Cylinders Subjected to Boundary Pressures: X. Chen, C. P. Tan and C. M. Haberfield 779

An Axi-symmetric Infinite Element for Transient Radial Flow Problems: N. Khalili, S. Valliappan and M. Yazdchi 801

A Packing Generation Scheme for the Granular Assemblies with 3D Ellipsoidal Particles: C.-Y. Wang, C.-F. Wang and J. Sheng 815

Layered Elastic Model for Analysis of Cone Penetration Testing: Z. Q. Yue and J.-H. Yin 829

Issue No. 9, 10 August 1999

ANNOUNCEMENT 851

Analytic Solutions to the Advective Contaminant Transport Equation with Non-linear Sorption: D. Sheng and D. W. Smith 853

A Pore-scale Numerical Model for Flow Through Porous Media: Yi Zhu, P. J. Fox and J. P. Morris 881

A New Method for Modelling the Rock Micro-fracturing Process in Double-torsion Experiments Using Neural Networks: X.-T. Feng and M. Seto 905

A Kinematic Hardening Constitutive Model for Sands: The Multiaxial Formulation: A. Gajo and D. Muir Wood 925

CONFERENCE DIARY 967

CONTENTS LISTING 971

Issue No. 10, 25 August 1999

Instability of Gradient Dependent Elasto-viscoplasticity for Clay: E. C. Aifantis, F. Oka, A. Yashima and T. Adachi 973

Multi-scale Limit Load Analysis for Discontinuous Rock Mass based on the Homogenization Method: T. Kyoya, K. Terada and T. Kawamoto 995

Approximate Computer Analysis of Pile Groups Subjected to Loads and Ground Movements: H. G. Poulos 1021

Design of Raft–Pile Foundation using Combined Optimization and Finite Element Approach: S. Valliappan, V. Tandjiria and N. Khalili 1043

BOOK REVIEWS 1067

CONFERENCE DIARY 1071

CONTENTS LISTING 1074

Issue No. 11, September 1999

Micromechanics Model for Elastic Stiffness of Non-spherical Granular Assembly: J.-J. Dong and Y.-W. Pan 1075

Simulation of the Crosshole Method in Isotropic and Anisotropic Media: S.-M. Kim, S.-T. Liao and J. M. Roesset 1101

Pile Driving by Numerical Cavity Expansion: M. E. Mabsout, S. M. Sadek and T. E. Smayra 1121

SHORT COMMUNICATIONS

Dynamic Soil–Structure Analysis using Lanczos Vectors with Adaptive Time Integration Technique: R. Venugopala Rao and N. S. V. Kameswara Rao 1141

Kinematic Slices Approach for Uplift Analysis of Strip Foundations: J. Kumar . . . 1159

BOOK REVIEWS

Time Effects in Rock Mechanics, by N. D. Cristescu and U. Hunsche: reviewed by G. Gioda . . . 1171

Vibration Analysis and Foundation Dynamics, by N. S. V. Kameswara Rao: reviewed by R. M. Madhav . . . 1172

CONFERENCE DIARY . . . 1173

Issue No. 12, October 1999

Interface Between Fluid- and Solid-like Behaviour in Rapid Granular Flows Down Bumpy Inclines: C.-S. Chou . . . 1175

Boundary Element Analysis of Geomechanical Fracture: A. J. Wilde and M. H. Aliabadi 1195

Formulation of a Unified Constitutive Model for Clays and Sands: J. M. Pestana and A. J. Whittle . . . 1215

Plasticity Solutions for Soil Behaviour Around Contracting Cavities and Tunnels: H. S. Yu and R. K. Rowe . . . 1245

Coupled Thermo-hydro-mechanical Modelling of Bentonite Buffer Material: T. Kanno, T. Fujita, S. Takeuchi, H. Ishikawa, K. Hara and M. Nakano . . . 1281

SHORT COMMUNICATIONS

Numerical Integration During Fourier Integral Analysis: R. W. I. Brachman and I. D. Moore . . . 1309

General Modelling of Expansive and Non-expansive Clays: J. C. Robinet, M. Pakzad, A. Jullien and F. Plas . . . 1319

Pullout Test Model for Extensible Reinforcement: N. Gurung, Y. Iwao and M. R. Madhav . . . 1337

Settlement of Soil due to Water Uptake by Plant Roots: S. Mathur . . . 1349

Limit State Analysis of Earthen Slopes using Dual Continuum/FEM Approaches: C. C. Swan and Y.-K. Seo . . . 1359

CONFERENCE DIARY . . . 1373

Issue No. 13, November 1999

Special Issue—Tunnelling
Guest Editors: G. Gioda, T. Kawamoto and G. Swoboda

A Review of Numerical Analysis of Tunnels in Discontinuous Rock Masses: T. Kawamoto and Ö. Aydan 1377

Developments and Applications of the Numerical Analysis of Tunnels in Continuous Media: G. Gioda and G. Swoboda 1393

Back Analysis of the Measurements Performed During the Excavation of a Shallow Tunnel in Sand: G. Gioda and L. Locatelli 1407

An Analysis of Geotechnical Problems Involving Strain Softening Effects: D. Sterpi . 1427

Back Analysis on Large Geotechnical Models: G. Swoboda, Y. Ichikawa, Q. Dong and M. Zaki 1455

A Study of Problems Associated with Finite Element Excavation Analysis by the Stress-flow Coupled Method: H. Ohtsu, Y. Ohnishi, H. Taki and K. Kamemura . . 1473

Special Issue—Poroelasticity
Guest Editors: Y. Abousleiman, M. Bai, A. H.-D. Cheng and M. Zaman

GUEST EDITORIAL 1493

Stress–Strain Analysis in Productive Gas/Oil Reservoirs: G. Gambolati, P. Teatini and L. Tomasi 1495

A Hybrid Finite Element Method for Fluid-filled Porous Materials: D. Zeng, N. Katsube and J. Zhang 1521

An Elastoplastic Analysis of Non-isothermal Consolidation: H. Zhang, M. Bai, Y. Abousleiman and J.-C. Roegiers 1535

Wave-induced Pore Pressure Around a Buried Pipeline in Gibson Soil: Finite Element Analysis: D. S. Jeng and Y. S. Lin 1559

Dynamic Behaviour of Unsaturated Porous Media: Governing Equations Using the Theory of Mixtures with Interfaces (TMI): K. K. Muraleetharan and C. Wei 1579

Determination of Permeability of Soils Using the Multiple Piezo-element Penetrometer: C. R. Song, G. Z. Voyiadjis and M. T. Tumay 1609

Green's Functions in Layered Poroelastic Half-spaces: E. Pan 1631

Water Wave Driven Seepage in Sediment and Parameter Inversion Based on Pore Pressure Data: Y. Mu, A. H.-D. Cheng, M. Badiey and R. Bennett 1655

CONFERENCE DIARY 1675

Issue No. 14, 10 December 1999

Special Issue
John R. Booker Memorial Issue

John Robert Booker, AO, B.Sc., Ph.D., D.Eng., FIEAust, FAA 1679

A Boundary Element Method for Analysis of Contaminant Transport in Porous Media I: Homogeneous Porous Media: C. J. Leo and J. R. Booker 1681

A Boundary Element Method for Analysis of Contaminant Transport in Porous Media II: Non-homogeneous Porous Media: C. J. Leo and J. R. Booker 1701

Groundwater Pollution by Organic Compounds: A Two-dimensional Analysis of Contaminant Transport in Stratified Porous Media with Multiple Sources of Non-equilibrium Partitioning: A. H. Elzein and J. R. Booker 1717

Groundwater Pollution by Organic Compounds: A Three-dimensional Boundary Element Solution of Contaminant Transport Equations in Stratified Porous Media with Multiple Non-equilibrium Partitioning: A. H. Elzein and J. R. Booker 1733

A Fourier Laplace Transport Finite Element Method (FLTFEM) for the Analysis of Contaminant Transport in Porous Media: J. C. Wang and J. R. Booker 1763

Semi-analytic Solutions of Contaminant Transport from Deeply Buried Cylindrical Repository Surrounded by Zoned Media: C. J. Leo and J. R. Booker 1797

CONFERENCE DIARY 1817

Issue No. 15, 25 December 1999

Thermal Effects on Fluid Flow and Hydraulic Fracturing From Wellbores and Cavities in Low-permeability Formations: Y. Wang and E. Papamichos 1819

Onset of Natural Terrain Landslides Modelled by Linear Stability Analysis of Creeping Slopes with a Two-state Variable Friction Law: K. T. Chau 1835

Evaluation of One-dimensional *In-situ* Leaching Processes: J. Lui and B. H. Brady . 1857

Disturbed State Model for Sand–Geosynthetic Interfaces and Application to Pull-out Tests: S. Pal and G. W. Wathugala 1873

Stability of Earth Dam Contaminated by Chemical Transport: T. Ahn and C. S. Desai 1893

Selection of *p-y* Curves for the Design of Single Laterally Loaded Piles: M. F. Bransby 1909

Formation Stability after Hydraulic Fracturing: P. Papanastiou 1927

A Coupled Hydromechanical System Defined through Rock Mass Classification Schemes: J. Liu, D. Elsworth and B. H. Brady 1945

Use of Sparse Iterative Methods for the Resolution of Three-dimensional Soil/Structure Interaction Problems: H. Mroeuh and I. Shahrour 1961

Simulation of Geomembrane Response to Settlement in Landfills by using the Material Point Method: S. Zhou, J. Stormont and Z. Chen 1977

Application of an Advanced Multi-surface Kinematic Constitutive Soil Model: P. K. Woodward and F. Molenkamp 1995

FE-studies on the Influence of Initial Void Ratio, Pressure Level and Mean Grain Diameter on Shear Localization: J. Tejchman, I. Herle and J. Wehr 2045

Vertical Vibrations of a Rigid Disk Embedded in a Poroelastic Medium: X. Zeng and R. K. N. D. Rajapakse 2075
